

Home Page

Summary: The home page is how the user is first page the user is presented with while using the application. The center of the page contains a “Departure” option and a “Destination” option, with an “Add Date” option underneath both the “Departure” and “Destination” boxes. The user can also filter by restaurants, hotels, or places of interests regarding what they are looking for around their route. Additional filters allow the user to further customize their route. Once you hit the go button it will calculate the route, travel time, and show potential waypoints such as places of interest that can be added to the road trip.

Map Page

Summary: The map page contains the user's starting point and ending point. Once the user has entered their destination the map will highlight the route with a blue line with a green letter “A” representing your starting point and depending on how many stops the user makes will determine their letter with a red letter representing the final stop. The user can change their trip details on the left hand side of the page. In this section of Trip Details, the user can edit their Trip Settings, which includes parameters such as driving time, lunch time and dinner time, and if they prefer a scenic route.
